

Configuration

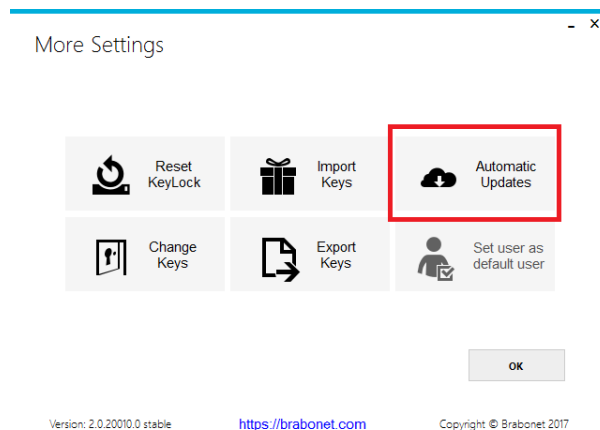

Basic options

Basic options will be visible immediately after starting KeyLock.

Automatic updates

You can find the settings for the Automatic updates by pressing “More Settings” and then pressing “Automatic updates”. You will have the following options:

- “Install all updates”: you will receive all updates.
- “Install important updates only”: you will receive critical updates only.
- “Install no updates”: you will receive no updates.
- “Install beta versions”: you will receive not only normal updates, but also updates to beta versions. These versions are sometimes unstable, but you will have access to new functions earlier.

Adding / Removing an unlock device

Adding a USB unlock device:
