

Configuration

Event Logging

All settings regarding Event Logging can be found as following:

1. Start KeyLock
2. Press “Event Logging”

Audio Recording

Do you want to record the voice and the noise of the person that wants to unlock your PC? Then this function is something for you. Activation is very simple:

1. Select “Enable Audio Recording”

KeyLock will now, when a suspicious action is detected, record all sounds for a period of 10 seconds.

Email Notifications

If you’re planning to leave your PC unattended for a long period of time, it can be useful to turn on Email Notifications. When something happens, KeyLock will automatically send an email. Make sure there is an internet connection though!

Activating works as followed:

1. Select “Enable Email Notifications”
2. Type your email address at “Email Address:”

Email address:

3. Press “Save”
