

Starting KeyLock for the first time

Before you can secure your PC, you'll have to go through some important steps

1. Create an unlock device:
 - 1.1. Start KeyLock
 - 1.2. Press "Add Unlock Device"
 - 1.3. Select at "Select Drive:" an USB Flash Drive

Select drive:

- 1.4. Press "Add / Remove"
 - 1.5. Press "Add Unlock Device"
2. Test KeyLock
 - 2.1. Make sure your Unlock Device is plugged in your computer correctly
 - 2.2. Turn on KeyLock protection and enable automatic locking
 - 2.3. Remove your unlock device
 - 2.4. If your PC is locked down now, KeyLock works correctly
 - 2.5. Put your unlock device back in
